Commissioner for Patents

Note attached PTO-1449 and reasons for allowance.

Steven J. Mottola
Primary Examiner

The following is an examiner's statement of reasons for allowance: regarding the rejection of claim 3 in the Chinese office action filed with the IDS of November 4, 2005, while the secondary reference (Japanese patent document 8-274599) is stated to disclose that the second inverter stage 5 is DC coupled to the first inverter stage 4 (fig. 1), it is not clear that this teaching could be applied to the primary reference to Tsunai (fig. 3A) because of the presence of clamp circuit 10 connected to the FET of second inverter stage 15. If the coupling capacitor between the first inverter stage 14 and second inverter stage 15 were removed to meet the "DC-coupled" limitation of line 4 of claim 3, the output of the first stage would be clamped as well as the input of the second stage which would result in substantially altered operation of the circuit.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
